

EVEN SAFER. EVEN MORE SUSTAINABLE. EVEN MORE DURABLE.
THE INNOVATION FOR CYCLE PATHS AND URBAN SPACES.

GRANUVIT® LR

With the EP-GRIP® VELO and EP-GRIP® URBAN product systems, POSSEHL has been successfully and sustainably building cycle paths, parkways, plazas and much more in public spaces for decades.

The system „epoxy resin base + stone mixture“ is well proven and installed on countless square metres throughout Europe. With GRANUVIT® LR we have improved this system even further.

What is GRANUVIT® LR made of?

GRANUVIT® LR consists of a special mixture containing recycled glass. This has been processed for use on public surfaces. The innovative GRANUVIT® LR scattering material replaces the usual rock mixture of the EP-GRIP® system.

GRANUVIT® LR offers a clear upgrade to known scattering materials and is particularly convincing in the points of safety, durability and sustainability.

All types of substrate can be coated - whether asphalt, concrete, wood or steel. The possibilities are also immense in terms of shaping and colour design of the surface.

With the EP-GRIP® system additive GRANUVIT® LR, we have a modern coating for cycle paths and urban surfaces that cannot be compared with any other product on the market. Innovation by POSSEHL - „Made in Germany“.

Even more durable.

A significantly improved colour stability also ensures a longer shelf life. Paint and surface wear out more slowly - even in places with high traffic volumes.

Even more sustainable.

Our epoxy resin already contains renewable raw materials. With the use of recycled glass in the stone mixture, we are further increasing the recycled content. This is an important contribution to reducing CO₂ emissions and improving the eco-balance.

Even safer.

GRANUVIT® LR has a higher retroreflection in wet and dark conditions. The visibility of the coated surface is improved and the clearer demarcation from the remaining traffic routes increases safety - especially in road traffic with an adjacent cycle path.

Since 1956, POSSEHL SPEZIALBAU has been active in the field of maintenance of vehicular-use surfaces, industrial and manufacturing areas, and aircraft-use pavements to maintain their value and ensure their use.

The company's headquarters are in Sprendlingen, Rheinland-Pfalz, Germany. In order to be closer to its customers, POSSEHL SPEZIALBAU is divided into regional divisions and operating facilities. The division Special Coatings for Airfield and Road Infrastructure is also based in Sprendlingen, and is internationally active.

From the very beginning, our corporate guidelines have entailed offering all construction services, including preparatory and additional work, from one source - to the benefit of our clients.

We view interdependent cooperation of the individual specialty divisions as one of our great strengths. Always standing behind POSSEHL SPEZIALBAU is a team of experienced specialists in the fields of surface construction and maintenance, who use their knowledge and expertise to focus on customized solutions to problems for the benefit of the customer.
